PROFESSIONAL SUMMARY

Analyst with 8+ years in finance (J&K Bank), healthcare (NHS/EMEA), and operations — owning end-to-end reporting cycles for senior stakeholders. Advanced Power BI and Excel practitioner who also automates what others rebuild manually: Python pipelines, CI/CD on GitHub Actions, AWS deployments. MSc Data Science. Comfortable as the only data person in the room.

CORE SKILLS

- ▶ Power BI — DAX, Power Query, executive dashboards
- ▶ Advanced Excel — PivotTables, Power Query, INDEX-MATCH
- ▶ SQL — data extraction, aggregation, ad-hoc analysis
- ▶ KPI tracking, operational & financial metrics
- ▶ EMEA & NHS compliance-grade reporting
- ▶ Python automation — Pandas, NumPy, report pipelines
- ▶ CI/CD — GitHub Actions, AWS deployment
- ▶ Data governance & audit-ready documentation
- ▶ Stakeholder reporting & executive briefings
- ▶ UAT support & dataset onboarding

PROFESSIONAL EXPERIENCE

Client Success & Data Coordinator

Jun 2025 – Dec 2025

Leeds Teaching Hospitals NHS Trust • Leeds, UK

- ▶ Owned periodic performance reporting for the Adult Diabetes Service — monitoring data accuracy KPIs, wait times, and resource allocation for senior NHS leadership.
- ▶ Built Power BI and Excel dashboards that replaced manual reporting, cutting turnaround time and providing C-suite with executive-ready visuals each cycle.
- ▶ Extracted and synthesised data across multiple clinical systems; delivered ad-hoc analysis that flagged early-intervention signals missed in existing reports.
- ▶ Led UAT-style validation and stakeholder training for two new datasets, reducing onboarding errors and accelerating adoption.

Client Support & Operations Specialist

Sep 2024 – Feb 2025

Sight Scotland • Edinburgh, UK

- ▶ Redesigned document and reporting workflows across a high-volume production environment — eliminating recurring errors and achieving consistent zero-defect output under deadline pressure.
- ▶ Coordinated cross-functional resolution of data and process issues; enforced version control standards that prevented downstream reporting failures.

Customer Experience & Operations Lead

May 2022 – Sep 2024

Prestonfield House Hotel • Edinburgh, UK

- ▶ Produced daily reconciliation, performance summaries, and executive briefings — maintaining accuracy across all management reporting outputs.
- ▶ Identified and implemented process automation that cut manual effort in routine reporting tasks.

Account Manager

Mar 2017 – Jan 2022

J&K Bank • Delhi, India

- ▶ Prepared daily, weekly, and monthly KPI reports for senior stakeholders — tracking portfolio performance, revenue trends, churn indicators, and account health across the branch.
- ▶ Built Excel-based financial reporting tools that surfaced risk signals and performance patterns, directly informing account strategy and expansion decisions.
- ▶ Maintained audit-ready, regulatory-compliant reporting outputs through multi-stakeholder sign-off processes across five years.

Project & Client Coordinator

Apr 2014 – Jun 2015

Vijay Nirman Company • Delhi, India

- Tracked and reported project performance metrics — timelines, milestones, resource utilisation — for management review; managed all documentation workflows.

SELECTED PROJECTS

AI-Powered Dashboard Generator — *Python · FastAPI · React*

Automated analytics engine that ingests any dataset and self-generates an executive-ready dashboard — profiling data, selecting KPIs, detecting anomalies, and producing interactive visualisations through a four-layer pipeline. Eliminates the manual rebuild each reporting cycle.

LogiAudit — Invoice Exception Reporting — *TypeScript · Next.js*

Reconciles third-party billing against order data and surfaces a provable, itemised overcharge report — every figure derived from plain arithmetic against contract terms, replacing manual line-by-line reconciliation with an audit-ready, repeatable output.

Churn Intelligence Engine — *Python · Streamlit*

Validates a customer dataset, scores churn risk with a rule-based engine, and auto-generates a stakeholder-ready PDF report with CI on every change — reliable, repeatable outputs without manual intervention.

Automated ML Reporting Pipeline — *Python · GitHub Actions · AWS*

End-to-end pipeline (data ingestion → model deployment) with full CI/CD via GitHub Actions and AWS — eliminating manual reporting intervention and enabling real-time performance monitoring at production scale.

NHS Performance & Power BI Dashboards — *Power BI · DAX · Excel*

Compliance-grade dashboards tracking NHS wait times, activity trends, and operational KPIs — built for C-suite review in a regulated EMEA environment, with dynamic DAX measures and time-series visualisations for quarterly planning.

EDUCATION & CERTIFICATIONS

MSc Data Science

2022 – 2023

Heriot-Watt University, Edinburgh • Capstone: ML-based Parkinson's Diagnosis • Focus: Predictive Modelling, Statistical Analysis

BEng Civil Engineering

2008 – 2012

University of Kashmir, India

Certification: Supervised Machine Learning — Coursera (Regression & Classification)
